

Construction scaffolding Non Slip Foldable Aluminium Ladder Anti Corrosion Powder Coated

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: bythai
- Certification: SGS,IOS
- Model Number: BT207
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: L/C, T/T

Product Specification

- Easy To Assemble: Yes
- Easy To Carry: Yes
- Foldable: Yes
- Load Capacity: 150kg
- Material: Aluminium
- Name: Foldable Aluminium Ladder
- Non-Slip Feet: Yes
- Safety Lock: Yes
- Safety Rungs: Yes
- Weight: 2.9kg-8.4kg
- Highlight: **Non Slip Foldable Aluminium Ladder,
Anti Corrosion Aluminium Ladder,
W 390mm Folding Aluminum Ladder**

Product Description

Aluminium Ladder

Our range of scaffolding ladders provide you with a safe and secure solution for working at height on a variety of construction and engineering projects. The use of high-quality materials and exquisite manufacturing technology ensures the product's durability and reliability, making it an indispensable tool on the construction site.

Our scaffolding is designed to be lightweight, easy to carry and set up, while providing excellent load-bearing capacity and stability. Whether indoors or outdoors, our products can adapt to various complex construction environments, ensuring that construction workers can complete their work safely and efficiently.

In addition to scaffolding, our range of ladders are also ideal for your construction operations. We offer a variety of ladder types and sizes, including folding, telescopic and fixed ladders, to suit different work needs. Each ladder is carefully designed with non-slip treads and a solid support structure to ensure user safety and comfort during use.

Whether you are engaged in construction, maintenance or decoration, our scaffolding ladder products can provide you with high-quality support and help, making your work easier and more efficient. Welcome to contact us to learn more details about our products, we look forward to working with you to create a better working environment together.

Aluminium ladder

Name	Width(mm)	Length(mm)	Weight(kg)
Aluminium ladder	390	2000	2.9
	390	3000	4.2
	390	4000	5.6
	390	5000	7
	390	6000	8.4

product description:

Scaffolding ladders are essential tools designed specifically for scaffolding systems, providing workers with safe and convenient access up and down, allowing them to easily enter and leave the scaffolding platform to complete various high-altitude operations. Our scaffolding ladders are made of high-strength aluminum alloy or steel. They are stable and durable and are indispensable and important equipment on construction sites.

Features:

Stable and durable: Made of high-quality aluminum alloy or steel, the structure is stable, has good load-bearing capacity and wind resistance, ensuring the safety of workers on the ladder.

Folding design: The design is lightweight, can be folded and stored, takes up little space, is easy to store and carry, and facilitates the layout and management of the construction site.

Anti-slip tread: The ladder tread is designed with anti-slip texture to increase the stability of workers when standing and reduce the risk of accidental slipping.

Multifunctional application: In addition to being used as an upper and lower passage for scaffolding, it can also be used for various types of maintenance, cleaning and other work indoors and outdoors, and has a wide range of applications.

Easy to operate: The design is simple and easy to operate. No professional training is required. Workers can quickly master the correct use method and improve construction efficiency.
