

## High Durability Reusability and Flexibility Frame System Scaffolding

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT04

### Product Specification

- Material: Steel
- Stability: High
- Color: Steel, Painted Color
- Cost-effectiveness: Yes
- Easy Installation: Yes
- Safety: High
- Load Capacity: High
- Flexibility: High

## Product Description

### Product Description:

Frame System Scaffolding is a revolutionary new scaffolding system that is perfect for any commercial or residential construction project. It is designed for maximum durability, light weight, easy dismantling, and maximum safety. The frame is made of high quality steel, making it extremely durable for any construction job. The lightweight design makes it easy to move and install. It is also easy to dismantle when no longer needed. With this system, custom sizes for any project are available. It is also one of the safest scaffolding systems available, with safety features built in to ensure your safety during construction and repair projects. Frame System Scaffolding is perfect for any walk through scaffold system or walk through scaffold system application.

### Features:

**Frame System Scaffolding** - a ladder frame, h scaffold system for safe and easy installation.

**Safety** - high safety standard.

**Easy Installation** - easy installation with no extra tools or components needed.

**Weight** - lightweight design for easy transport and setup.

**Material** - high quality steel for strength and durability.

**Surface Treatment** - powder coating to protect against rust and corrosion.

### Technical Parameters:

Parameters	Details
Size	Customized
Cost-effectiveness	Yes
Weight	Lightweight
Easy Dismantling	Yes
Safety	High
Color	Steel, Painted Color
Surface Treatment	Powder Coating
Easy Installation	Yes
Material	Steel
Stability	High

### Applications:

Bythai BT04 frame scaffolding system is the perfect choice for construction. It features high load capacity, easy dismantling, high stability, powder coating surface treatment and cost-effectiveness. This frame scaffolding system is designed to provide safety and reliability for workers during construction projects. Its high load capacity, easy dismantling capability, and high stability make it the perfect choice for any construction project. The powder coating surface treatment also helps to protect the frame from rust and corrosion, making it even more durable. With its cost-effectiveness, you can be sure you are getting the best value for your money. Bythai BT04 frame scaffolding system is the ideal choice for any construction need.

### Customization:

Bythai BT04 Frame System Scaffolding is your perfect choice for any scaffolding or mobile frame needs. This system is highly flexible, with a high load capacity and stability that is customizable to your needs. Additionally, this product is highly reusable, making it an extremely cost-effective solution to any project. With Bythai BT04 Frame System Scaffolding, you get the highest quality structure for your scaffold or mobile frame needs.
