Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Model Number: BM201
- Minimum Order Quantity: 1000
- Price: 4.5
- Delivery Time: 15-25

Product Specification

- Name: Scaffolding Coupler
- Type: Right Angle
- Standard: EN74-1
- Surface Treatment: Galvanized
- Application: Construction
- Feature: High Strength
- Color: Silver
- MOQ: 1000
- Highlight: Galvanized Coupler Scaffolding, EN74-1 Coupler Scaffolding, Scaffolding Joint Coupler

Product Description

High Quality Coupler Scaffolding With EN74-1 Standard Compliance

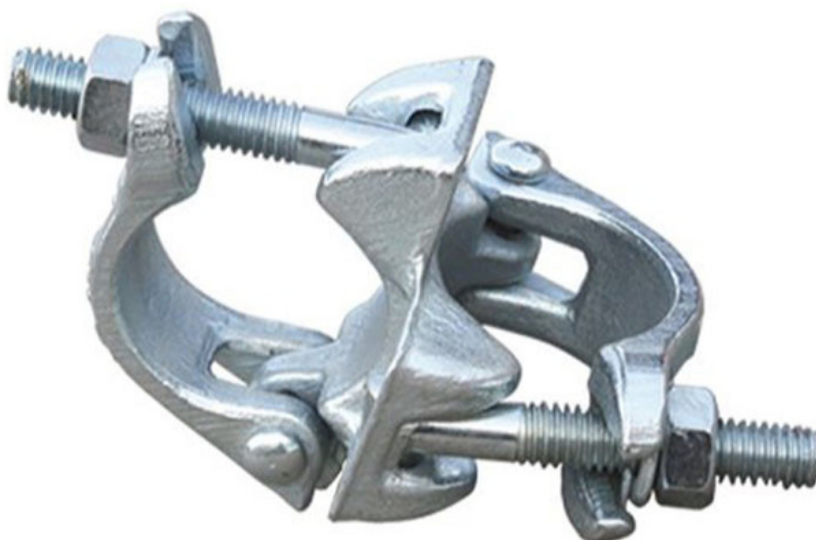

Product Description:

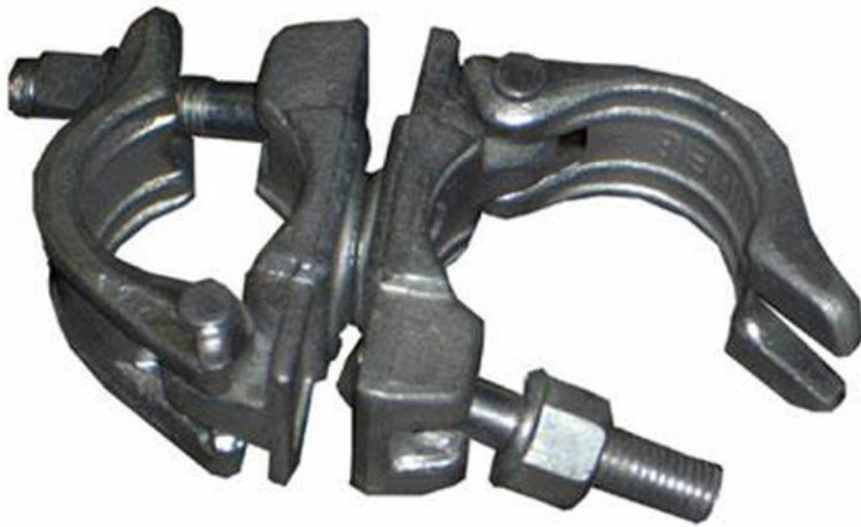

Scaffolding Coupler is an essential construction product for connecting scaffolding tubes, mainly used in right angle connections. This product is made of galvanized steel and is galvanized to meet the EN74-1 standard. It is a double coupler with a silver color and is widely used in the scaffolding industry.

This Scaffolding Coupler is designed for quick assembly and disassembly. It has a strong connection with galvanized surface that creates a reliable and durable connection. The right angle design ensures a secure connection and can be used for a variety of applications.

This silver-colored Scaffolding Coupler is ideal for use in scaffolding applications due to its galvanized steel construction and EN74-1 standard. It is designed to be easy to use and provides a reliable connection that can withstand a variety of environmental conditions. It is also corrosion-resistant and can be used in a variety of applications.

The Scaffolding Coupler is a reliable and durable construction product that is ideal for right angle connections in scaffolding applications. It is made of galvanized steel and meets the EN74-1 standard. The silver color makes it easy to recognize and the right angle design ensures a secure connection. This product is corrosion-resistant and can be used in a variety of applications.
