EN12810 EN12811 Standard Ringlock Scaffolding Horizontal Load Capacity ≥15KN

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT03

Product Specification

- Vertical Load Capacity: ≥45KN
- Safety Factor: ≥4
- Warranty: 2 Years
- Material: Q235 Steel
- Standard: EN12810 & EN12811
- Vertical Adjustment: ≤±3°
- Components: Vertical, Horizontal, Diagonal, Brace, Base Plate, Ladder, Etc.
- Horizontal Adjustment: ≤±3°
- Highlight: **15KN Ringlock System Scaffolding**, **EN12811 Standard Ringlock Scaffolding**

Product Description

Product Description:

Ringlock System Scaffolding

Ringlock System Scaffolding is a modular, versatile, and efficient scaffolding system which is designed for heavy-duty applications. It is the ideal solution for most construction projects, providing strength and stability with increased safety. The system is based on a patented ringlock connection that locks into place for a secure connection between components.
The Ringlock System Scaffolding is compliant with European standards EN12810 and EN12811. It features double-locking joints for added safety, and hot-dip galvanized surface treatment for improved durability. The system is also adjustable with a vertical adjustment of up to ±3°, and provides a horizontal load capacity of up to 15KN.
The Ringlock System Scaffolding is easy to assemble and disassemble, and is suitable for use in a variety of projects, from industrial and commercial to civil engineering and residential construction. The system is also compatible with other scaffolding systems, such as cup-lock scaffolding and frame scaffolding.
The Ringlock System Scaffolding is an essential tool for construction projects of any size. It is a safe and reliable system, designed to provide maximum stability and safety for workers and materials.

Features:

Product Name: Ringlock System Scaffolding
Safety Factor: ≥4
Joints: Double-locking
Warranty: 2 Years
Max Height: ≤30m
Horizontal Load Capacity: ≥15KN

Applications:

Bythai Brand BT03 Ringlock System Scaffolding, made of high-quality Q235 Steel, provides a stable, safe and efficient scaffolding solution for all kinds of industrial projects. The components of the Ringlock System Scaffolding include vertical, horizontal, diagonal, brace, base plate, ladder, etc., with a horizontal loading capacity of ≥15KN and full compliance with EN12810 & EN12811 standards. The surface treatment of the Ringlock System Scaffolding is hot-dip galvanized, which ensures the product's durability, corrosion resistance, and long-term service life. The accessories of the Ringlock System Scaffolding, including ringlock ledger, ringlock standard and ringlock rosette, are all manufactured with high precision and meet the highest quality standards. The Ringlock System Scaffolding is suitable for various sites, such as industrial, residential, commercial and educational, providing a secure and reliable scaffolding solution for all kinds of construction projects.

Customization:

Bythai Ringlock System Scaffolding
Brand Name: Bythai
Model Number: BT03
Place of Origin: China
Max Height: ≤30m
Joints: Double-locking
Horizontal Load Capacity: ≥15KN
Vertical Adjustment: ≤±3°
Size: 48.3mm
The Bythai Ringlock System Scaffolding is designed for maximum safety and reliability. Its double-locking joints provide superior strength and stability, and its vertical adjustment range of ≤±3° allows for precise positioning of the scaffold. With a maximum height of ≤30m and a horizontal load capacity of ≥15KN, the Ringlock System Scaffolding is an ideal choice for any heavy-duty construction project. Plus, the size of 48.3mm ensures compatibility with all standard Ringlock components.

Support and Services:

Ringlock System Scaffolding Technical Support and Service
We provide comprehensive technical support and service for Ringlock System Scaffolding products, including 24/7 customer service, technical advice, and troubleshooting.
Our team of experts is available to answer all of your questions and provide you with the best advice on installation, maintenance, and repair. We also offer a range of maintenance and repair services, including on-site inspections, repairs, and replacements.
Our experienced technicians are always on hand to help you with any product-related issues. We also provide a comprehensive after-sales service, including warranty support, product upgrades, and software updates.
We are committed to providing the highest quality of customer service and technical support for all of our Ringlock System Scaffolding products. If you have any questions or need assistance, please do not hesitate to contact us.

Packing and Shipping:

Packaging and Shipping

The Ringlock System Scaffolding is packaged in a cardboard box. The box contains the scaffolding parts which are pre-assembled and

ready to use. The box also contains the necessary tools and instructions for assembly and installation.
The Ringlock System Scaffolding is shipped via ground transportation. Delivery times vary depending on the location of the customer.
