- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Color: Steel/Spray Plastic
- Material: Q235
- Size: Customized
- Shipping Origin: China
- Load Capacity: High
- Arrival Time: 10-15

Product Description:

Frame System Scaffolding - A Robust Solution for Construction Projects

Frame System Scaffolding is a high-quality, customizable scaffold system designed to meet the demands of modern construction projects. It is made from high-grade Q235 material, ensuring durability and strength for any construction site. This system is perfect for projects that require high load capacity and can be easily shipped from China.

Arrive on Time with H Scaffold System

With an arrival time of 10-15 days, our H scaffold system is a reliable and efficient solution for your construction needs. It is designed to be quick and easy to assemble, saving you time and labor costs. The system can be easily transported to your project site, ensuring that your construction schedule stays on track.

Customized for Your Needs

Our Scaffold Frame system is highly versatile, allowing for customized configurations to fit your specific project requirements. Whether you need a single or double frame system, we can provide the perfect solution for your construction needs. Our team of experts will work closely with you to create a personalized scaffolding system that meets all your project needs.

Strong and Durable System Scaffolding

The System Scaffolding is made from Q235 material, making it incredibly strong and durable. This high-grade material ensures that the scaffolding can withstand heavy loads and harsh weather conditions, making it ideal for use in various construction projects. Our scaffolding system is built to last, saving you time and money in the long run.

High Load Capacity for Heavy Duty Projects

Our Frame System Scaffolding is designed to meet the demands of heavy-duty construction projects. With a high load capacity, it can support the weight of workers, tools, and materials, providing a safe and stable working platform. This system is also suitable for tall structures and can be easily adjusted to different heights, making it a versatile choice for any project.

Shipped from China - A Cost-Effective Option

Our System Scaffolding is manufactured in China, making it a cost-effective option for construction companies around the world. We offer competitive pricing without compromising on quality, making our scaffolding system a popular choice for construction projects of all sizes. With quick shipping and delivery, you can have your scaffolding system on-site in no time.

In conclusion, our Frame System Scaffolding is a reliable, versatile, and cost-effective solution for your construction needs. With a focus on quality and durability, our scaffolding system is designed to meet the demands of modern construction projects, ensuring safety and efficiency on your job site.

Applications:

Bythai BM205 Frame System Scaffolding

Bythai BM205 Frame System Scaffolding is a high-quality and durable scaffolding product that is widely used in construction and renovation projects. It is a portal frame scaffold erection that is easy to assemble and disassemble, making it a popular choice among workers. This scaffolding frame system is designed to provide safe and reliable support for workers at various heights, allowing them to work efficiently and comfortably.

Application

Bythai BM205 Frame System Scaffolding is suitable for a wide range of applications, including building construction, bridge construction, shipbuilding, power plants, oil and gas refineries, and many other industrial and commercial projects. It is also commonly used in home renovation and maintenance projects. This versatile scaffolding system can be used in both indoor and outdoor settings, making it a practical and convenient choice for any project.

Scene

A construction site in China is a typical scene where Bythai BM205 Frame System Scaffolding is used. Workers can be seen assembling and erecting the scaffolding frames to provide a safe working platform at various heights. The scaffolding is used to support workers as they carry out tasks such as painting, cleaning, and repairing. The strong and stable structure of the scaffolding system ensures that workers can work comfortably and safely, without the risk of accidents or injuries.

Brand Name and Model Number

Bythai is a well-known brand in the scaffolding industry, and the BM205 model is one of its best-selling products. As a reputable brand, Bythai ensures that all its products meet the highest quality standards and are made using the best materials. The BM205 model is designed to be strong, durable, and easy to use, making it a popular choice among construction professionals.

Place of Origin and Certification

Bythai BM205 Frame System Scaffolding is manufactured in China, ensuring that it is made with precision and attention to detail. The

scaffolding system is also certified by SGS, a globally recognized certification body. This certification guarantees that the product meets all safety and quality standards, giving customers peace of mind when using the product.

Price and Packaging Details

The price of Bythai BM205 Frame System Scaffolding ranges from 4.5-8.5, depending on the size and customization options. The scaffolding is packed in bundles, making it easy to transport and store. The compact packaging also helps to reduce shipping costs, making it a cost-effective option for construction projects.

Delivery Time and Payment Terms

Bythai understands the importance of timely delivery, which is why the company ensures that all orders are delivered within 10-15 days. The scaffolding frames are shipped from China, and customers can choose to pay using TT or TC, depending on their preference.

Size and Arrival Time

Bythai BM205 Frame System Scaffolding is available in various sizes, and customers can also request for customized sizes to meet their specific project requirements. The scaffolding frames are designed to be lightweight and easily adjustable, making it easy to set up and dismantle. This also means that the scaffolding can be quickly transported and arrive at the construction site within 10-15 days.

Color and Material

Bythai BM205 Frame System Scaffolding is available in two color options – steel and spray plastic. The steel option provides a classic and industrial look, while the spray plastic option adds a pop of color and can be used for branding purposes. The scaffolding is made of high-quality Q235 material, ensuring its strength and durability.

Packing and Shipping:

Frame System Scaffolding Packaging and Shipping

Our Frame System Scaffolding is carefully packaged and shipped to ensure safe delivery to our customers. Here is our packaging and shipping process:

Step 1: The scaffolding is carefully inspected for any defects or damages before packaging.

Step 2: The scaffolding is then disassembled and each component is individually wrapped and secured to prevent any movement during shipping.

Step 3: The components are then placed in a sturdy and secure packaging material to protect them during transit.

Step 4: The packaged scaffolding is then loaded onto a shipping container or pallet, depending on the size and quantity of the order.

Step 5: Our shipping team carefully loads the scaffolding onto the designated transportation vehicle, ensuring that it is safely secured for transportation.

Step 6: The scaffolding is shipped to the customer's designated location, with tracking information provided for the customer to monitor the delivery status.

Step 7: Upon delivery, the customer should carefully inspect the scaffolding for any damages or missing components. If there are any issues, please contact our customer service team immediately.

We take great care in our packaging and shipping process to ensure that our customers receive their Frame System Scaffolding in excellent condition. Thank you for choosing our product!
