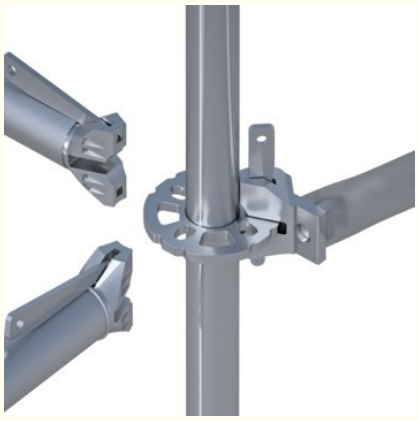
Architecture Structure Scaffolding Ring Lock with Q235 Steel Material

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC



Product Specification

- Surface Treatment: Hot-dip Galvanized
- Material: Q235 Steel
- Application Scenarios: Architecture
- Shipping Origin: China
- Warranty: 2 Years
- Product Name: Ringlock System
- Highlight: **Architecture Scaffolding Ring Lock**, **Q235 Steel Scaffolding Ring Lock**

Product Description

Product Description:

Product Overview - Ringlock System Scaffolding

Ringlock System Scaffolding is a highly reliable and secure scaffolding solution that is widely used in the architecture industry. It is designed to provide a safe and efficient working platform for workers at elevated heights. The system is made of high-strength steel and is hot-dip galvanized to ensure durability and longevity. With a warranty of 2 years, this product is a cost-effective and long-term investment for any construction project.

The Ringlock System is known for its easy assembly, making it a popular choice among construction companies. It consists of various components such as standards, ledgers, diagonal braces, and base collars, all of which are designed to fit perfectly together. The product also features a unique ringlock ledger head that allows for secure scaffolding joints, ensuring the safety of workers on the platform.

One of the key advantages of the Ringlock System is its versatility. It can be used in various application scenarios, including construction of high-rise buildings, bridges, and other structures. Its flexibility allows for easy customization to fit the specific needs of different projects.

This product is shipped from China, where it is manufactured using the latest technology and strict quality control measures. This ensures that each component of the system meets the highest standards and provides optimal performance. The Ringlock System is a reliable and trusted product that has been used in numerous construction projects worldwide.

In summary, the Ringlock System Scaffolding is a top-of-the-line product that offers a secure and efficient scaffolding solution for any construction project. Its hot-dip galvanized surface treatment, 2-year warranty, and use of high-strength steel make it a durable and cost-effective choice. With its easy assembly, versatile application scenarios, and secure scaffolding joints, this product is a must-have for any construction company looking for a safe and reliable scaffolding system.

Applications:

Ringlock System Scaffolding - Bythai

The Ringlock System Scaffolding by Bythai is a highly versatile and durable scaffolding solution perfect for a wide range of construction and maintenance projects. Made from high-quality Q235 steel, this scaffolding system is designed to provide a stable and safe working platform for workers.
Application Scenarios

The Ringlock System Scaffolding is suitable for a variety of applications in the architecture industry. It can be used for building construction, bridge construction, shipbuilding, power plant construction, and many other projects that require a reliable and robust scaffolding system.
Product Features

One of the key advantages of the Ringlock System Scaffolding is its high load capacity. It can support heavy loads, making it ideal for use in construction projects that require workers to carry heavy materials and equipment. Its stable structure also ensures the safety of workers while working at height.
The Ringlock System Scaffolding is known for its durability and flexibility. It can be used in a variety of configurations, including straight, curved, and circular structures. This makes it a cost-effective choice for projects that require scaffolding in different shapes and sizes.
Why Choose Bythai Ringlock System Scaffolding?

Bythai is a trusted brand in the construction industry, known for its high-quality scaffolding products. The Ringlock System Scaffolding is no exception. With its superior design and construction, it offers a reliable and safe working platform for workers, ensuring maximum productivity and efficiency on the job site.
With its 2-year warranty, customers can have peace of mind knowing that they are investing in a long-lasting and durable scaffolding system. And with its competitive pricing, the Bythai Ringlock System Scaffolding is a cost-effective choice for any construction project.
Choose Bythai Ringlock System Scaffolding for your next construction project and experience the convenience, safety, and durability that it offers.

Customization:

Customized Design to suit specific project needs

High Quality Q235 Steel material for durability and stability

Easy Installation Scaffold System for efficient and cost-effective construction

Hot-dip Galvanized surface treatment for corrosion resistance

Versatile and suitable for various application scenarios, especially for architecture projects

Trusted and reliable with SGS certification
Our Customized Service for Bythai BM202 Ringlock System Scaffolding

At Bythai, we understand the importance of meeting specific project requirements. That's why we offer customized services for our Ringlock System Scaffolding to ensure the best fit for your construction needs. Our service includes:

Customized Design - Our team will work closely with you to design a scaffolding system that meets your project's unique needs and specifications.

Efficient and Cost-effective Solutions - Our Ringlock System Scaffold is designed for easy installation and dismantling, saving you time and labor costs.

High Quality Material - We use Q235 Steel, a strong and durable material, to ensure the stability and safety of your construction project.

Surface Treatment - Our scaffolding is hot-dip galvanized for maximum protection against corrosion.

Reliable Warranty - We offer a 2-year warranty for our Ringlock System Scaffolding, giving you peace of mind and confidence in our product.
Trust Bythai for Your Customized Ringlock System Scaffolding Needs

With our Soporte Diagonal Ringlock, Easy Installation Scaffold System, and customized services, Bythai BM202 is the perfect choice for your construction project. Our commitment to high quality, durable, and cost-effective solutions will ensure the success of your project. Contact us today to discuss your specific needs and let us provide you with a reliable and trusted Ringlock System Scaffolding solution.

Packing and Shipping:

Ringlock System Scaffolding – Packaging and Shipping

Our Ringlock System Scaffolding is carefully packaged and shipped to ensure safe and efficient delivery to our customers.
Each component of the scaffolding system is individually wrapped and labeled for easy identification and organization. These components are then placed in sturdy, weather-resistant boxes or crates to protect them during transport.
We also offer customized packaging options to accommodate specific shipping needs, such as bulk orders or international shipping. Our team will work closely with you to determine the best packaging and shipping solution for your order.
Once packaged, our Ringlock System Scaffolding is shipped via reliable and trusted carriers to ensure timely delivery. Our shipping partners have extensive experience in handling large and fragile items, giving you peace of mind that your order will arrive in perfect condition.
At Ringlock System Scaffolding, we take great care in packaging and shipping our products to guarantee customer satisfaction. Contact us today to learn more about our packaging and shipping options.
