

Q235 Steel Ringlock Scaffolding Industrial Scaffold Ring System

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Application Scenarios: Architecture
- Material: Q235 Steel
- Product Name: Ringlock System
- Surface Treatment: Hot-dip Galvanized
- Warranty: 2 Years
- Shipping Origin: China
- Highlight: **Q235 Steel Scaffold Ring System,
Industrial Q235 Steel Ringlock Scaffolding**

Product Description

Product Description:

Ringlock System Scaffolding

This versatile and high capacity scaffolding system is designed to meet and exceed all Compliant Scaffolding Standards. Made from Q235 steel, the Ringlock System is hot-dip galvanized for maximum durability and corrosion resistance, ensuring a long lifespan and high performance.

The Ringlock System features a unique rosette design, providing multiple connection points for maximum flexibility and easy assembly. This allows for quick and efficient setup, saving time and labor costs. The hot-dip galvanized surface treatment also adds an extra layer of protection, making this system suitable for use in various weather conditions.

With a 2-year warranty, you can trust the reliability and safety of the Ringlock System. It is a popular choice for construction projects and industrial applications, offering superior strength and stability for working at height.

Originating from China, the Ringlock System Scaffolding is known for its quality and cost-effectiveness. It is a popular choice among contractors and builders worldwide, providing a sturdy and secure platform for workers to perform their tasks with ease.

Overall, the hot dip galvanized Ringlock System Scaffolding is a top-of-the-line product that offers a safe, versatile, and efficient solution for all your scaffolding needs. So why wait? Get your hands on this reliable and high-quality product today!

Technical Parameters:

Ringlock System Scaffolding Technical Parameters

Product Name	Ringlock System
Shipping Origin	China
Material	Q235 Steel
Warranty	2 Years
Surface Treatment	Hot-dip Galvanized
Application Scenarios	Architecture
Key Features	Hot Dip Galvanized Ringlock, Versatile Ringlock Scaffold, Ringlock Ledger Head

Applications:

Ringlock System Scaffolding: A Versatile and Reliable Choice for Architectural Projects

As one of the leading Ringlock Scaffold Suppliers in the market, Bythai is proud to introduce our advanced Ringlock System Scaffolding – the BM202 model. Manufactured in China with the highest quality Q235 steel, this product is certified by SGS and is suitable for a wide range of architectural projects. With a price range of 4.5-8.5, our Ringlock System Scaffolding is not only affordable but also offers long-lasting and reliable solutions for construction needs.

Secure and Efficient Scaffolding Joints

The key feature of our Ringlock System Scaffolding is its secure and efficient scaffolding joints. The advanced Ringlock technology ensures a tight and stable connection between the vertical and horizontal components, making it a safe and reliable choice for construction projects. This feature also allows for easy assembly and dismantling, saving time and effort on the job site.

Versatile Construction System

Designed for various construction needs, our Ringlock System Scaffolding is a versatile choice for both small and large-scale projects. Its modular system allows for customization, making it suitable for different types of structures and complex architectural designs. This system can also be easily adjusted to different heights and angles, providing flexible solutions for various construction needs.

Reliable and Safe

Safety is our top priority, and our Ringlock System Scaffolding is built to meet the highest safety standards. With its secure joints and sturdy structure, this scaffolding system can withstand heavy loads and strong winds, ensuring a safe working environment for construction workers. It also comes with a 2-year warranty, providing peace of mind for our customers.

Customizable Solutions

At Bythai, we understand that every construction project is unique, and that's why we offer customizable solutions for our Ringlock System Scaffolding. Whether it's a specific height, width, or design requirement, our team can work with you to create a tailored solution that meets your project's needs and specifications.

High Load Bearing Capacity

With its high-quality Q235 steel material, our Ringlock System Scaffolding has a high load-bearing capacity, making it suitable for heavy-

duty construction projects. This feature also ensures the durability and longevity of our product, making it a cost-effective choice for long-term construction needs.

Durable and Long-lasting

Hot-dip galvanized for corrosion resistance, our Ringlock System Scaffolding is built to withstand harsh weather conditions and frequent use on construction sites. This makes it a durable and long-lasting choice for both indoor and outdoor projects, providing value for money for our customers.

Cost-effective Choice

With its customizable solutions, high load-bearing capacity, and long-lasting durability, our Ringlock System Scaffolding is a cost-effective choice for architectural projects. Its ease of assembly and dismantling also saves time and labor costs, making it a practical choice for construction companies and contractors.

Conclusion

In summary, Bythai's Ringlock System Scaffolding is a versatile, reliable, and cost-effective choice for architectural projects. With its secure joints, advanced technology, and customizable solutions, it provides a safe and efficient working environment for construction workers. Choose Bythai for your next construction project and experience the benefits of our top-quality Ringlock System Scaffolding.

Customization:

As a reliable Ringlock Scaffold Supplier, Bythai offers customized services to meet the specific needs of our customers. Our versatile Ringlock Scaffold can be tailored to fit any construction project.

We understand the importance of secure scaffolding joints, which is why our Ringlock System is designed with durable steel construction, ensuring safety and stability on the job site.

At Bythai, we value our customers and strive to provide the best quality products at competitive prices. Our team works closely with clients to customize the Ringlock System Scaffolding according to their requirements.

With a 2-year warranty and hot-dip galvanized surface treatment, our Ringlock System Scaffolding is built to last and withstand harsh weather conditions. Trust Bythai for all your scaffolding needs.

Packing and Shipping:

Packaging and Shipping

The Ringlock System Scaffolding is carefully packaged and shipped to ensure safe delivery and easy handling. The packaging includes sturdy wooden crates or pallets to protect the scaffolding components during transportation. Each package is labeled with detailed information such as product name, quantity, and destination to ensure efficient handling and tracking.

The scaffolding components are bundled and secured with steel bands or plastic straps to prevent any movement or damage during transit. The packages are also wrapped with protective materials such as bubble wrap or corrugated cardboard to provide additional cushioning and protection.

For international shipments, the scaffolding is loaded into shipping containers and properly secured to prevent shifting or damage during ocean freight. The containers are sealed and labeled with the necessary shipping information for easy identification and handling.

Our experienced logistics team works closely with trusted shipping partners to ensure timely delivery and proper handling of the scaffolding. We also provide insurance for all shipments to protect against any unforeseen circumstances.

Upon arrival, the scaffolding components can be easily unloaded and transported to the desired location using forklifts or cranes. Our packaging and shipping process ensures that the Ringlock System Scaffolding is delivered in excellent condition and ready for immediate use.
