

Q235 Steel Ringlock System Scaffolding Hot Dip Galvanized Scaffold System

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Surface Treatment: Hot-dip Galvanized
- Product Name: Ringlock System
- Material: Q235 Steel
- Application Scenarios: Architecture
- Warranty: 2 Years
- Shipping Origin: China
- Highlight: **Q235 Ringlock System Scaffolding, Hot Dip Galvanized Scaffold System, Architecture Ringlock System Scaffolding**

Product Description:

Ringlock System Scaffolding: A Secure and Versatile Scaffold Solution

Made from high-quality Q235 steel, the Ringlock System Scaffolding is a durable and reliable scaffolding system that is designed to meet the needs of various construction projects. It is the perfect choice for construction workers and contractors who require an easy installation scaffold system that offers secure scaffolding joints.

Product Overview

The Ringlock System Scaffolding is a versatile scaffold solution that is widely used in construction, renovation, and maintenance projects. It is designed to provide a safe and stable working platform for workers at different heights. With its unique design and sturdy structure, it can support heavy loads and provide a secure working environment for construction workers.

Shipping Origin: China

The Ringlock System Scaffolding is manufactured in China, ensuring that it meets the highest quality standards. Our manufacturing facility uses advanced technology and strict quality control measures to produce scaffolding systems that are durable and reliable.

Material: Q235 Steel

The Ringlock System Scaffolding is made from Q235 steel, which is known for its high strength and durability. This material is commonly used in the construction industry due to its excellent mechanical properties and resistance to rust and corrosion.

Surface Treatment: Hot-dip Galvanized

To ensure the longevity of the scaffolding system and protect it from corrosion, the Ringlock System is hot-dip galvanized. This process involves coating the steel with a layer of zinc, which creates a barrier against corrosion and extends the lifespan of the scaffolding.

Product Name: Ringlock System

The name "Ringlock System" is derived from the unique design of the scaffolding, which consists of horizontal and vertical steel tubes that are connected by rings. This design allows for quick and easy installation, making it an ideal choice for construction projects of all sizes.

Warranty: 2 Years

We stand behind the quality and durability of our Ringlock System Scaffolding and offer a 2-year warranty to our customers. This warranty covers any defects in materials or workmanship, giving you peace of mind and ensuring your satisfaction with our product.

Key Features

Easy installation scaffold system

Secure scaffolding joints

Corrosion-resistant Ringlock System

Versatile scaffold solution

With its easy installation, secure joints, and corrosion-resistant properties, the Ringlock System Scaffolding is the perfect choice for any construction project. It offers a safe and stable working platform for workers, making it an essential tool for any construction site.

Technical Parameters:

Product Name	Ringlock System
Shipping Origin	China
Surface Treatment	Hot-dip Galvanized
Warranty	2 Years
Application Scenarios	Architecture
Material	Q235 Steel
Product Name	Ringlock System
Shipping Origin	China
Surface Treatment	Hot-dip Galvanized
Warranty	2 Years
Application Scenarios	Architecture
Material	Q235 Steel
Key Features	Soporte Diagonal Ringlock, Layher Scaffolding, Steel Ringlock Scaffolding

Applications:

Ringlock System Scaffolding - Your Best Choice for Construction

Brand Name: Bythai
Model Number: BM202
Place of Origin: China
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15
Payment Terms: TT/TC
Material: Q235 Steel
Warranty: 2 Years

The Ringlock System Scaffolding, also known as the steel ringlock scaffolding, is an Easy Installation Scaffold System that is widely used in various construction sites. It is a Scaffold Coupler System that offers a safe and efficient way to build and maintain high-rise buildings, bridges, tunnels, staircases, platforms, facades, industrial facilities, overpasses, and even offshore oil platforms.

Application Scenarios:

Architecture: The Ringlock System Scaffolding is an essential tool for construction projects in the architectural field. It provides a stable and secure platform for workers to perform tasks such as painting, plastering, and bricklaying. With its easy installation and dismantling process, it is suitable for both small and large-scale projects.

High-rise Buildings: When it comes to constructing high-rise buildings, safety is of utmost importance. The Ringlock System Scaffolding offers a high load-bearing capacity and is designed to withstand strong winds, making it a reliable choice for building tall structures.

Bridges and Tunnels: The Ringlock System Scaffolding is also commonly used in the construction of bridges and tunnels. Its flexibility allows it to adapt to different shapes and sizes, making it ideal for projects that require scaffolding to be set up in curved or angled structures.

Staircases and Platforms: The Ringlock System Scaffolding can also be used for creating temporary staircases or platforms to provide access to higher levels of a building or a construction site. Its modular design allows for easy customization to fit specific requirements.

Facades and Industrial Facilities: The Ringlock System Scaffolding is not limited to just construction sites; it is also widely used in the maintenance and repair of building facades and industrial facilities. Its versatility and stability make it a preferred choice for such projects.

Overpasses and Offshore Oil Platforms: The Ringlock System Scaffolding is designed to withstand harsh weather conditions, making it suitable for use in outdoor projects such as overpasses and offshore oil platforms. Its high load-bearing capacity and durability make it a reliable option for these types of projects.

Shipping Origin: The Ringlock System Scaffolding is proudly made in China, ensuring high-quality materials and craftsmanship at a competitive price.

With its SGS certification, the Ringlock System Scaffolding meets international safety standards, giving you peace of mind when using it for your construction projects.

Choose Bythai's Ringlock System Scaffolding for your next construction project and experience its efficiency, safety, and durability.

Customization:

Product Name: Ringlock System Scaffolding

Brand Name: Bythai
Model Number: BM202
Place of Origin: China

Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15 days
Payment Terms: TT/TC

Customized Services for Bythai BM202 Ringlock System Scaffolding

At Bythai, we understand that every construction project is unique and requires specific scaffolding solutions. That's why we offer customized services for our BM202 Ringlock System Scaffolding to meet your specific project needs. Our customized services include:

Secure Scaffolding Joints: Our Ringlock System scaffolding is designed with secure joints to ensure the safety and stability of the scaffolding structure.

Customized Design: We can design the scaffolding according to your specific project requirements, such as height, weight capacity, and specific site conditions.

Multiple Sizes: Our BM202 Ringlock System Scaffolding comes in multiple sizes to fit different construction needs.

Easy Assembly: Our scaffolding is designed for easy assembly, saving you time and labor costs.

High Load Capacity: Our Ringlock System scaffolding has a high load capacity, making it suitable for heavy construction projects.

Durable and Reliable: Made from Q235 steel, our scaffolding is durable and reliable, ensuring its longevity and safety.

Cost-effective: Our customized services are cost-effective, providing you with a tailored solution at a competitive price.

Hot-dip Galvanized Coating: Our scaffolding is coated with hot-dip galvanization, making it corrosion-resistant and suitable for outdoor use.

Superior Quality: Our BM202 Ringlock System Scaffolding is manufactured with high-quality materials and undergoes strict quality control to ensure superior quality.

Quick Delivery: We understand the importance of timely delivery, and we strive to deliver your customized scaffolding within 10-15 days.

Professional Service: Our team of experts is dedicated to providing professional and efficient services to ensure your satisfaction.

Choose Bythai BM202 Ringlock System Scaffolding for your construction needs and enjoy our superior quality, customized services, and professional support. Contact us now for a quote and let us help you build your project with confidence!

Packing and Shipping:

Product Name: Ringlock System Scaffolding
Packaging and Shipping:

The Ringlock System Scaffolding is packaged in strong and durable wooden crates to ensure safe transportation and protection during shipping. Each crate is carefully labeled with product information and handling instructions for easy identification and handling.

For smaller orders, the scaffolding components are packed in high-quality cartons with foam inserts to prevent any damages during transit.

All packaging materials used are environmentally friendly and comply with international shipping standards.

Once the scaffolding is packaged, it is loaded onto pallets and securely wrapped with shrink wrap to prevent any movement or damage during transportation. The pallets are then stacked and loaded into shipping containers for international shipments or onto trucks for domestic deliveries.

We work with trusted and reliable shipping companies to ensure timely and safe delivery of our products to our customers worldwide. Our team carefully tracks and monitors the shipment to provide updates and ensure prompt delivery.

With our efficient packaging and shipping process, our customers can be assured that their Ringlock System Scaffolding will arrive in excellent condition, ready for use on their projects.
