Pre Galvanized Surface Scaffolding Plank**

Product Description:

Scaffolding Plank

Scaffolding plank, also known as steel plank, is an essential component in the construction industry. It is used to create a safe and stable working platform for workers to perform various tasks at different heights. The Scaffolding plank is an important part of the scaffolding system, which is widely used in construction, renovation, maintenance, and other industrial fields.

Our Scaffolding plank is made of high-quality steel material, ensuring its durability and strength. We provide different types of scaffolding planks, including steel plank ringlock scaffolding, steel plank 230, and steel plank ringlock, to meet the various needs of our customers. The steel plank ringlock scaffolding is a multi-functional scaffolding system that can be used for both vertical and horizontal support. It is easy to assemble and disassemble, making it a popular choice for construction sites. The steel plank 230 is a lightweight and cost-effective option, suitable for smaller projects or temporary structures. The steel plank ringlock is a versatile solution for complex and irregular structures, providing maximum flexibility and adaptability.

Our Scaffolding plank is available in different surface treatments, including pre-galvanized, hot dip galvanized, and spray plastic. The pre-galvanized surface provides a protective zinc coating, making it resistant to corrosion and rust. The hot dip galvanized surface provides a thicker layer of zinc coating, making it more durable and suitable for harsh environments. The spray plastic surface offers a colorful and anti-slip surface, enhancing the safety and aesthetics of the scaffolding plank.

All our Scaffolding planks are produced in China, the world's leading manufacturing hub. Our factory is equipped with advanced equipment and skilled workers, ensuring the high quality and consistent performance of our products. We also have a strict quality control system in place to ensure that every scaffolding plank meets the highest standards.

To ensure the safe and efficient transportation of our products, we package our scaffolding planks in containers. This packaging method protects the products from damage during shipment and allows for easy handling and storage.

Our Scaffolding plank is an essential and reliable tool for any construction project. It provides a stable and secure working platform for workers, increasing their productivity and safety. With our high-quality products and excellent customer service, we have gained a reputation for being a trustworthy and professional scaffolding plank supplier. Contact us today for a competitive steel plank price and start building with confidence!

Applications:

Scaffolding Plank - Bythai

Brand Name: Bythai

Model Number: BM205

Place of Origin: China

Minimum Order Quantity: 1000

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 10-15

Payment Terms: container, shipping

Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic

Product Description

Scaffolding Plank is an essential component of any scaffolding system. It is a flat, sturdy platform made of high-quality steel that provides a safe working surface for construction workers. Bythai's scaffolding steel plank is designed to meet the rigorous demands of the construction industry, ensuring safety and durability.

Application

Steel scaffolding planks are widely used in various construction sites, such as buildings, bridges, highways, and tunnels. They provide a stable and secure platform for workers to stand on while they work at height. Bythai's scaffolding plank is perfect for both indoor and outdoor projects, making it a versatile and essential tool for any construction project.
