

Hot Dip Galvanized Scaffold Coupler System For Q235 Steel

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Surface Treatment: Hot-dip Galvanized
- Application Scenarios: Architecture
- Product Name: Ringlock System
- Material: Q235 Steel
- Shipping Origin: China
- Warranty: 2 Years
- Highlight: **Galvanized Steel Scaffold Coupler System, Architecture Galvanized Scaffold Coupler System, Hot Galvanized Ringlock Scaffolding**

Hot-Dip Galvanized Scaffold Coupler System For Q235 Steel On Sale

Product Description:

Ringlock System Scaffolding - A Revolutionary Product for Architecture

The Ringlock System Scaffolding is a versatile and durable scaffolding system made from high-quality Q235 steel, designed and manufactured in China. This innovative product is widely used in the construction industry, offering a safe and efficient solution for various architectural projects.

Material: Q235 Steel

The Ringlock System Scaffolding is made from Q235 steel, which is known for its high strength, durability, and resistance to corrosion. This material is commonly used in construction and engineering projects, making it the perfect choice for a reliable and long-lasting scaffolding system.

Shipping Origin: China

The Ringlock System Scaffolding is proudly designed and produced in China. As one of the leading manufacturers and suppliers of ringlock scaffolding in the world, we ensure that our product meets the highest standards of quality and safety.

Warranty: 2 Years

With our confidence in the quality and durability of our product, we offer a 2-year warranty for the Ringlock System Scaffolding. This warranty covers any manufacturing defects and guarantees that the scaffolding system will function as intended for a minimum of 2 years.

Application Scenarios: Architecture

The Ringlock System Scaffolding is specifically designed for use in architectural projects. Its versatility, easy assembly, and high load-bearing capacity make it suitable for a wide range of applications, including but not limited to building construction, renovation, and maintenance.

Product Name: Ringlock System

The product name, Ringlock System, accurately reflects the unique design and functionality of our scaffolding system. The term "ringlock" refers to the rosette joint that connects the ledgers and standards, providing a secure and stable structure. This system is known for its efficiency, strength, and ease of use, making it a popular choice among contractors and builders.

Ringlock Scaffold Supplier

As a reputable ringlock scaffold supplier, we take pride in offering top-quality products and excellent customer service. Our team of experts is dedicated to providing our clients with the best scaffolding solutions for their specific needs and ensuring a smooth and hassle-free experience from start to finish.

Ringlock Ledger Head and Standard

The Ringlock System Scaffolding consists of two main components - the ledger head and the standard. The ledger head is a horizontal bar with wedge connectors that lock onto the standards, forming a sturdy platform for workers to stand on. The standard is a vertical pole with rosette joints that allow for easy and secure assembly of the scaffolding system.

In conclusion, the Ringlock System Scaffolding is a revolutionary product that offers a safe, efficient, and cost-effective solution for all your architectural scaffolding needs. Made from high-quality Q235 steel and backed by a 2-year warranty, this versatile system is designed to meet the highest standards of quality and performance, making it a valuable asset for any construction project. Choose the Ringlock System Scaffolding for your next project and experience the difference it makes!

Technical Parameters:

Attribute	Value
Application Scenarios	Architecture
Product Name	Ringlock System

Surface Treatment	Hot-dip Galvanized
Warranty	2 Years
Shipping Origin	China
Material	Q235 Steel
Advanced Technology	Advanced Ringlock Technology
Scaffold Type	Ring Lock Type Scaffold
Compliance	Compliant Scaffolding Standards

Applications:

Ringlock System Scaffolding - Versatile, Durable, and Cost-effective

Brand Name: Bythai
Model Number: BM202
Place of Origin: China
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15 days
Payment Terms: TT/TC
Warranty: 2 Years
Material: Q235 Steel
Shipping Origin: China
Surface Treatment: Hot-dip Galvanized

The Ringlock System scaffolding, also known as the "Allround" scaffolding system, is a highly versatile and durable scaffolding solution. It is designed and manufactured by Bythai in China, and has been certified by SGS for its quality and safety standards.

High Load Bearing Capacity

The ringlock scaffolding is made of high-quality Q235 steel, which has a high load bearing capacity and can withstand heavy loads. This makes it suitable for use in various construction sites and industrial projects, including high-rise buildings, bridges, shipyards, power plants, oil refineries, and petrochemical plants.

Easy Assembly and Safe Stability

The ringlock scaffolding is designed for easy and quick assembly, with its unique rosette connections and built-in wedge locks. This allows for a safe and stable structure, ensuring the safety of workers and the success of the project. It also comes with a variety of scaffolding accessories, such as the ringlock ledger head, to provide additional support and stability.

Cost-effective and Durable

The hot-dip galvanized ringlock scaffolding is corrosion-resistant and can withstand harsh weather conditions, making it a durable and long-lasting solution. Its versatility also means that it can be reused for different projects, making it a cost-effective investment for construction companies and contractors.

Widely Used in Various Applications

The ringlock system scaffolding is widely used in various applications, including construction sites, building maintenance, temporary structures, and even special events. Its flexibility and adaptability make it suitable for different types of projects and structures.

Conclusion

The Ringlock System scaffolding by Bythai is a reliable, versatile, and cost-effective solution for all your scaffolding needs. With its high load bearing capacity, easy assembly, safe stability, and wide range of applications, it is the preferred choice for construction companies and contractors all over the world.

Customization:

Customized Service for Bythai Ringlock System Scaffolding

Brand Name: Bythai
Model Number: BM202
Place of Origin: China
Certification: SGS
Price: 4.5-8.5
Packaging Details: In bundles
Delivery Time: 10-15
Payment Terms: TT/TC
Product Name: Ringlock System Scaffolding
Warranty: 2 Years
Application Scenarios: Architecture
Surface Treatment: Hot-dip Galvanized
Material: Q235 Steel

Key Features:

Ringlock scaffolding, also known as Scaffolding Ring Lock, is a highly efficient and versatile scaffold system.

Easy Installation Scaffold System: With its unique design, the Bythai Ringlock System can be easily and quickly assembled and disassembled, saving time and labor costs.

Customized Service: We offer customized solutions to meet specific project requirements, ensuring the perfect fit for any construction site.

High Quality: Our Ringlock System is made of high-quality Q235 steel, ensuring superior strength and durability.

Reliable Performance: The Bythai Ringlock System has been tested and certified by SGS, ensuring its safety and reliability.

Safe and Secure: The advanced locking mechanism of the Ringlock System provides a safe and secure working platform for construction workers.

Durable: The hot-dip galvanized surface treatment of our Ringlock System provides excellent corrosion and weather resistance, making it suitable for long-term use in various environments.

Cost-effective: The efficient and flexible design of the Bythai Ringlock System helps to reduce construction costs and increase productivity.

Flexible and Versatile: Our Ringlock System can be used for a wide range of applications, from simple to complex structures, making it a versatile solution for any construction project.

Efficient Construction: The Bythai Ringlock System allows for fast and efficient construction, saving time and labor costs.

Wide Application: Our Ringlock System is suitable for various construction scenarios, including architecture, industrial and civil engineering, and more.

Superior Strength: The Q235 steel material used in our Ringlock System provides superior load-bearing capacity, ensuring a safe and secure working environment for construction workers.

Weather Resistance: The hot-dip galvanized surface treatment of our Ringlock System provides excellent resistance to harsh weather conditions, making it suitable for use in different climates.

Packing and Shipping:

Packaging and Shipping of Ringlock System Scaffolding

Ringlock System Scaffolding is carefully packaged and shipped to ensure safe delivery to its destination. The packaging materials used are strong and durable to protect the scaffolding components during transportation. The following steps are taken to package and ship Ringlock System Scaffolding:

Each individual component is first inspected for any defects or damages.

All components are then carefully placed into strong and sturdy cardboard boxes.

The boxes are sealed and labeled with the product name and specifications for easy identification.

Pallets are used to stack and secure the boxes to prevent any movement during transportation.

Shrink wrap is then applied to the pallets to provide additional protection and stability.

The pallets are then loaded onto a truck or container for shipping.

For international shipments, additional measures are taken to ensure the scaffolding arrives safely at its destination:

The scaffolding is packed in compliance with international shipping regulations.

Customs forms and documents are prepared and attached to the shipment.

The shipment is loaded onto a container and sealed for secure transportation.

Tracking information is provided to the customer for real-time updates on the shipment's location.

At Ringlock System Scaffolding, we take great care in packaging and shipping our products to ensure they arrive in excellent condition. Our goal is to provide our customers with high-quality scaffolding that can be safely transported to any location in the world. If you have any questions or concerns about our packaging and shipping process, please do not hesitate to contact us.
