

Galvanized Coupler Scaffolding for Easy and Secure Connections

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- Surface Treatment: Galvanized
- Application: Construction
- Material: Steel
- Standard: EN74-1
- MOQ: 1000
- Color: Silver
- Feature: High Strength
- Package: Container
- Highlight: **Secure Galvanized Coupler Scaffolding ,
EN74-1 Galvanized Coupler Scaffolding**

Product Description

Product Description:

Scaffolding Coupler: The Perfect Connector for Scaffold and Structure

The Scaffolding Coupler is a vital component used in construction projects to connect scaffolding tubes and structures with high strength and reliability. Made from high-quality steel, this product is designed to withstand heavy loads and harsh environments, making it an essential tool for any construction site.

Material: Steel

The Scaffolding Coupler is made of durable steel, ensuring its strength and longevity. This material is known for its high tensile strength and can withstand heavy loads without bending or breaking, making it the perfect choice for construction projects.

Application: Construction

The main application of the Scaffolding Coupler is in construction, where it is used to connect scaffolding tubes and structures. It is a crucial component in creating a stable and secure scaffolding structure, providing a safe working platform for workers to carry out their tasks.

Surface Treatment: Galvanized

To further enhance its durability and resistance to corrosion, the Scaffolding Coupler is coated with a layer of galvanized finish. This surface treatment protects the steel from rust and other forms of damage, ensuring the product's longevity and reliability.

Package: Container

The Scaffolding Coupler is available in a container package, making it easy to transport and store. This packaging also helps to protect the product from damage during transit, ensuring that it arrives at the construction site in perfect condition.

Feature: High Strength

One of the key features of the Scaffolding Coupler is its high strength. It is designed to withstand heavy loads and harsh environments, providing a stable and secure connection between scaffolding tubes and structures. This feature ensures the safety of workers and the stability of the entire scaffolding structure.

In conclusion, the Scaffolding Coupler is an essential product for any construction project that requires a reliable and strong connection between scaffolding and structures. Made from high-quality steel, featuring a galvanized finish, and packaged in a container, this product is the perfect choice for all your scaffolding and structure connection needs. Invest in the Scaffolding Coupler for a safe and efficient construction process.

Features:

Product Name: Scaffolding Coupler

Material: Steel

Name: Scaffolding Coupler

Surface Treatment: Galvanized

Color: Silver

Feature: High Strength

Scaffold and Structure Connectors

British Scaffold Fixtures

Manual Scaffold Connection Tools

Technical Parameters:

Parameter	Value
Color	Silver
Material	Steel
Feature	High Strength
Standard	EN74-1
Application	Construction
Package	Container
MOQ	1000
Name	Scaffolding Coupler
Surface Treatment	Galvanized
Other Names	Japanese Steel Pipe Connectors, Universal Scaffold Clamping Tools

Packing and Shipping:

Scaffolding Coupler Packaging and Shipping

Our Scaffolding Coupler is carefully packaged to ensure safe delivery to our customers. Each coupler is individually wrapped and placed in a sturdy cardboard box with padding to prevent any damage during transit.

The packaging is clearly labeled with the product name, size, and quantity for easy identification. We also include a packing slip with each order, detailing the contents of the package.

For shipping, we use reputable courier services to ensure timely and reliable delivery. The shipping cost will be calculated based on the

weight and destination of the package.

For international orders, we comply with all customs regulations and provide proper documentation to facilitate smooth customs clearance.

Once the package is shipped, we will provide a tracking number for customers to track their order until it reaches their doorstep.

At Scaffolding Coupler, we take great care in packaging and shipping our products to ensure customer satisfaction. We strive to deliver our products in pristine condition and in a timely manner.
