Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: container
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Product Name: Ringlock System
- Material: Q235 Steel
- Warranty: 2 Years
- Surface Treatment: Hot-dip Galvanized
- Application Scenarios: Architecture
- Shipping Origin: China
- Highlight: **Hot dip Galvanized Scaffold Coupler System, Q235 Steel Ringlock Scaffolding Components, Large Scale Projects Scaffold System**

Product Description

Product Description:

Ringlock System Scaffolding: The Ultimate Solution for Your Construction Needs

Ringlock System Scaffolding is a versatile and durable scaffolding product that is specially designed for use in architecture. It is compliant with all scaffolding standards and is perfect for a wide range of construction projects. With its hot-dip galvanized surface treatment and 2-year warranty, this product is built to last and withstand the toughest conditions.

Surface Treatment: Hot-dip Galvanized

The Ringlock System Scaffolding is hot-dip galvanized, which means it has a protective layer of zinc coating that prevents corrosion and rusting. This makes it ideal for use in both indoor and outdoor construction projects, even in harsh weather conditions.

Warranty: 2 Years

We are confident in the quality and durability of our product, which is why we offer a 2-year warranty. This ensures that you can use our product with peace of mind, knowing that it is backed by our guarantee.

Product Name: Ringlock System

The name "Ringlock System" comes from the unique design of the scaffolding, which features interlocking rings that provide a strong and stable structure. This innovative design makes it easy to assemble and dismantle, saving you time and effort on your construction projects.

Application Scenarios: Architecture

The Ringlock System Scaffolding is specially designed for use in architecture, making it perfect for a wide range of construction projects such as buildings, bridges, and even temporary structures. Its versatile design allows it to be used in both simple and complex construction projects.

Shipping Origin: China

Our Ringlock System Scaffolding is proudly made in China, where we use the highest quality materials and advanced manufacturing techniques to ensure the best possible product for our customers. We carefully inspect and package each scaffolding product to ensure safe and timely delivery to our customers worldwide.

Compliant Scaffolding Standards

The Ringlock System Scaffolding is compliant with all scaffolding standards, including the EN 12810 and EN 12811 standards. This means you can trust that our product meets all safety and quality requirements, ensuring a secure and reliable scaffolding solution for your construction projects.

Corrosion-Resistant Ringlock

Our hot-dip galvanized ringlock system is not only aesthetically pleasing but also highly resistant to corrosion and rust. This makes it suitable for use in various environments, including high humidity and coastal areas, where traditional scaffolding may not hold up well.

Versatile and Durable

The Ringlock System Scaffolding is designed to be versatile and durable, with the ability to adapt to different construction scenarios. It can be used for both vertical and horizontal structures, providing a stable and secure platform for workers to perform their tasks safely and efficiently.

Easy to Assemble

The unique design of the Ringlock System Scaffolding makes it easy to assemble and dismantle, even for beginners. The interlocking rings and simple locking mechanism allow for quick and efficient assembly, reducing construction time and labor costs.

Cost-Effective

The Ringlock System Scaffolding is not only durable and versatile, but it is also cost-effective. Its long lifespan and easy assembly make it a cost-efficient choice for any construction project. Additionally, its hot-dip galvanized surface treatment reduces maintenance and replacement costs in the long run.

In conclusion, the Ringlock System Scaffolding is the ultimate solution for your construction needs. With its compliant standards, corrosion-resistant design, and versatility, it offers a reliable and cost-effective scaffolding solution for various applications in architecture. Made in China with the highest quality materials, it is a product you can trust to get the job done right. Order yours today and experience the difference it can make in your construction projects.

Features:

Product Name: Ringlock System Scaffolding
Material: Q235 Steel
Warranty: 2 Years
Surface Treatment: Hot-dip Galvanized
Application scenarios: Architecture
Shipping origin: China
Ring lock type scaffold
Secure Scaffolding Joints
Advanced Ringlock Technology
High Durability

Technical Parameters:

Product Name	Ringlock System
Shipping Origin	China
Application Scenarios	Architecture
Material	Q235 Steel
Surface Treatment	Hot-dip Galvanized
Warranty	2 Years
Key Features	- Layher Scaffolding - Corrosion-Resistant Ringlock - Quality Scaffold Connector

Applications:

Ringlock System Scaffolding - Designed for Efficient and Safe Construction
Brand Name: Bythai
Model Number: BM202
Place of Origin: China
Certification: SGS

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 10-15

Payment Terms: TT/TC

Shipping origin: China

The Ringlock System Scaffolding from Bythai is a versatile and durable product that has been specifically designed for the construction industry. Made from high-quality Q235 steel, this scaffolding system offers a safe and stable working platform for workers to perform their tasks. The product is certified by SGS, ensuring its quality and safety standards.

Application Scenarios: Architecture

The Ringlock System Scaffolding is ideal for various construction projects, especially in the field of architecture. Whether it is for building high-rise structures, bridges, or other complex structures, this scaffolding system provides the necessary support and stability for workers to carry out their tasks safely and efficiently.

Product Attributes

1. Safety and Stability

The Ringlock System Scaffolding comes with a unique design that provides maximum safety and stability to workers. The ringlock ledger head and ledger end are designed to securely connect the scaffolding components, ensuring a safe working environment.

2. High Load Capacity

The scaffolding system has a high load capacity, making it suitable for heavy-duty construction projects. It can withstand heavy loads and provide a stable platform for workers to perform their tasks efficiently.

3. Efficiency and Flexibility

The Ringlock System Scaffolding is designed to increase the efficiency of construction work. Its modular design allows for quick and easy assembly, saving time and labor costs. The scaffolding can also be adjusted to fit different heights and angles, making it flexible for various construction needs.

4. Cost-effective

Bythai's Ringlock System Scaffolding is a cost-effective solution for construction projects. Its durability and reusability make it a cost-efficient choice, reducing the need for frequent replacements.

5. Versatility and Multi-functionality

This scaffolding system is not only limited to construction projects. It can also be used for various industrial and maintenance purposes, such as painting, cleaning, and repairing. Its versatility makes it a valuable asset for any construction site.

6. Easy Installation

The Ringlock System Scaffolding is designed for quick and easy installation. Its components are lightweight and can be assembled without the need for specialized tools or equipment. This feature makes it an ideal choice for projects with tight deadlines.

7. Corrosion Resistance

The scaffolding system is coated with a durable layer that protects it from corrosion. This ensures the product's longevity and makes it suitable for use in various weather conditions.

8. Adjustable

The Ringlock System Scaffolding can be adjusted to fit different heights and angles, making it suitable for various construction needs. This feature also allows for easy access to hard-to-reach areas, increasing worker safety and efficiency.

9. Durability and Warranty

Bythai's Ringlock System Scaffolding is made from high-quality Q235 steel, making it durable and long-lasting. The product comes with a 2-year warranty, giving customers peace of mind and ensuring the product's quality.

Conclusion

The Ringlock System Scaffolding from Bythai is a top-of-the-line product that offers safety, stability, efficiency, and versatility for construction projects. With its easy installation, high load capacity, and cost-effectiveness, this scaffolding system is a must-have for any construction site. Choose Bythai's Ringlock System Scaffolding for a reliable and efficient construction solution.

Customization:

Customized Services for Bythai Ringlock System Scaffolding

Brand Name: Bythai

Model Number: BM202

Place of Origin: China

Certification: SGS

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 10-15

Payment Terms: TT/TC

Product Name: Ringlock System

Material: Q235 Steel

Surface Treatment: Hot-dip Galvanized

Shipping Origin: China

Application Scenarios: Architecture

Key Features: Soporte Diagonal Ringlock for secure scaffolding joints

Our customized services for Bythai Ringlock System Scaffolding include:

Personalized branding with your company logo and information

Customized model numbers and specifications to meet your specific project needs

Flexible packaging options to fit your shipping and storage requirements

Fast delivery time to ensure efficient project timelines

Various payment methods to suit your financial preferences

High-quality Q235 steel material for durability and strength

Hot-dip galvanized surface treatment for corrosion resistance

Expert shipping from our origin in China to your desired destination

Application scenarios tailored to your unique architecture projects

Emphasis on secure scaffolding joints with our Soporte Diagonal Ringlock feature
