

Heavy duty Construction Ringlock System Scaffolding Q235 Steel Hot Dip Galvanized Scaffold

Our Product Introduction

for more products please visit us on bythaiscaffold.com

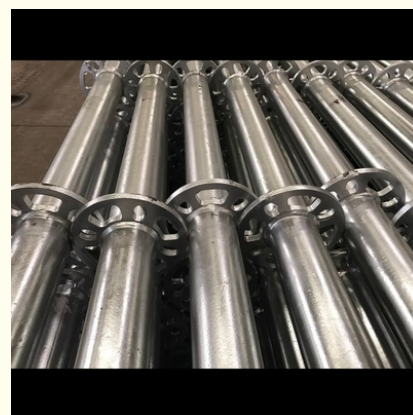

Basic Information

- Place of Origin: Tianjin China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Minimum Order Quantity: 1000
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Surface Treatment: Hot-dip Galvanized
- Product Name: Ringlock System
- Shipping Origin: China
- Material: Q235 Steel
- Application Scenarios: Architecture
- Warranty: 2 Years
- Highlight: **Q235 Ringlock System Scaffolding, Hot Dip Galvanized Ringlock System Scaffolding, Heavy duty Ringlock System Scaffolding**

Technical Parameters:

Technical Parameter	Specification
Material	Q235 Steel
Application Scenarios	Architecture
Surface Treatment	Hot-dip Galvanized
Warranty	2 Years
Product Name	Ringlock System
Shipping Origin	China
Place of Origin	Tianjin, China

Applications:

The Bythai Ringlock System Scaffolding, with its model number BM202, is a versatile and robust solution for a variety of construction and architectural projects. Originating from China, this product adheres to the highest Compliant Scaffolding Standards as it comes with an SGS certification, ensuring its quality and reliability in the field. The system is crafted from high-grade Q235 Steel, known for its strength and durability, which guarantees a Warranty of 2 years.

Designed with convenience in mind, the Bythai BM202 offers an Easy Installation Scaffold System that significantly reduces assembly time on-site. This is beneficial for projects that demand swift and efficient scheduling. The system's surface is given a Hot-dip Galvanized treatment, which provides a further layer of protection against the elements and corrosion, thereby extending the lifespan of the scaffolding.

When it comes to Application scenarios, the Bythai Ringlock System Scaffolding is primarily engineered for Architecture, suitable for supporting structures in both residential and commercial construction. Its robust design and versatile nature make it ideal for a wide range of applications, from simple access jobs to complex support structures.

As a Quality Scaffold Connector, the BM202 Ringlock System Scaffolding ensures solid and secure connections between components, which is essential for the safety and stability of the structure. It is competitively priced between 4.5-8.5 and comes packaged in bundles for easy transportation and storage. The anticipated Delivery Time for the product is 10-15 days, with Payment Terms set to TT/TC for the convenience of the purchaser. This system is an investment in safety and efficiency for any construction project.

Packing and Shipping:

The Ringlock System Scaffolding is meticulously packaged to ensure the utmost protection during transportation. Each component is encased in a sturdy wrapping material to prevent scratches and dents. The parts are then securely placed on wooden pallets, which are carefully banded and wrapped in shrink film to maintain the integrity of the package. Larger components are bundled together and clearly labeled for easy identification upon delivery.

For shipping, the palletized Ringlock System Scaffolding components are loaded into containers, maximizing space efficiency while ensuring stability and safety. All packages are accompanied by a detailed packing list, allowing for a quick verification process upon receipt. We adhere to all international shipping standards to guarantee that your scaffolding system arrives on time and in excellent condition.
